## Center of Photography - MOUGINS

The Mougins Center of Photography is an institution dedicated to still and moving images, tasked with promoting and exhibiting the many trends in contemporary photography. Open to all forms of photographic modernity, the Center, as a municipal institution, boosts the cultural and tourism sector of the town of Mougins, seeking to enhance the region and foster international communication.

It has the mission of supporting creation and experimentations by artists, both French and foreign, emerging and established. This support takes the form of production, exhibition, publishing and artist residency.

The program choices are guided solely by the principle of connection to reality through a selection of powerful and timely subjects, with respect for gender equality and proper recognition of women photographers, constantly alert and on the lookout for non-European expression. This desire, this ambition, calls for the devoted application of measures and actions to facilitate the diffusion of contemporary art.

### OPENING HOURS:

Open July - September: every day, from 11:00 a.m. to 7:00 p.m. except of Tuesday.

Tel.: 04 22 21 52 12

## Espace de l'Art Concret - MOUANS-SARTOUX

Founded in 1990, the Espace de l'Art Concret is a contemporary art centre of national interest with a collection of abstract art unique in France, the Donation Albers-Honegger.

This collection, included in the inventory of the Centre National des Arts Plastiques since 2000, today features almost 700 works of art from the top names in concrete art, as well as the most important players in minimalism, conceptual art, the supports/surfaces movement and the New Realists, testifying to the visionary spirit of the two Swiss collectors Sybil Albers and Gottfried Honegger, who made the donation to the State, and founded the art centre.

From the time of its creation, the eac. has made art the focal point of life. Its artistic, cultural and educational initiatives revolve around three complementary missions: conservation and promotion of the Albers-Honegger collection - research linked to temporary exhibitions and artists in residence - educating and raising public awareness about art today through mediations in exhibitions and artistic practice workshops.

### OPENING HOURS:

Open July - August: every day, from 11:00 a.m. to 7:00 p.m.  
September to June: from Wednesday to Sunday, from 1:00 p.m. to 6:00 p.m.

Tel.: 04 93 75 71 50

## International Perfume Museum - GRASSE

The International Perfume Museum, located in the birthplace of perfume making, retraces the world history of perfumes and showcases the know-how and ingenuity of Grasse-based industries. It is also a unique place, offering a multi-sensory approach to understanding the manufacture of perfumes and aromas, but also the use of fragrance for cultural, medicinal and seductive purposes.

The museum takes an anthropological approach to the history of fragrances in all its aspects - raw materials, manufacturing, industry, innovation and design through a wide variety of forms, including decorative arts, industrial heritage and ethnography.

In addition to the main part of the museum, visitors are offered further materials that open a discourse on an artistic vision of the world of fragrances. It has given free rein to several internationally-renowned contemporary artists to fit out some of the museum's indoor and outdoor spaces. The works of art created by Berdaguer & Péjus, Gérard Collin-Thiébaud, Peter Downsbrough, Brigitte Nahon, Jean-Michel Othoniel and Dominique Thévenin are inspired by the world of fragrance: scents and the awakening of the senses, luxury and design, glassworks and interplay of transparencies, industry and materials.

### OPENING HOURS:

Open July - August: every day, from 10:00 a.m. to 7:00 p.m.  
September - June: every day, from 10:00 a.m. to 6:00 p.m.
